

Mission Statement:

Nursing for All strengthens health in Liberia by investing in care designed and led by Liberian nurses to enhance access to high-quality health services and improve health outcomes.

Vision:

We envision a world where nurse-led care helps under-resourced communities everywhere live healthier lives.

Values:

1. **Nurse Led:** We believe nurses are trusted leaders in their communities and essential drivers of better health outcomes. We invest in their leadership, autonomy, and professional growth.
2. **Integrity & Accountability:** We steward resources responsibly, uphold ethical standards, and use data to guide decisions, measure impact, and remain accountable to communities and donors.
3. **Liberian-Led, Community-Rooted:** Our programs are designed and led by Liberians. Local knowledge, culture, and lived experience guide every decision we make.
4. **Respect & Dignity:** We honor the dignity, expertise, and lived experience of every patient, nurse, and partner. Care is grounded in compassion, trust, and human connection. Respect in practice includes fair compensation and policies that value nurses' contributions and sustain the workforce.
5. **Equity in Access to Quality Care:** We prioritize communities facing the greatest barriers to care and work to ensure services are preventive, respectful, and high quality, regardless of where people live.
